

Clearview Solution 400

The Clearview Solution 400 is a highly efficient clean burning convection stove and is the smallest Solution with an output of 5kw. The hot air wash system gives fascinating flame patterns and crystal clear glass, bringing elegance and comfort to any home, while the convection casing ensures a lower surface temperature, allowing closer installation to vulnerable surfaces. Clearview stoves come in a choice of seven colours, brass or steel door fittings and a top or rear flue position.
