

Dru Metro 80XT Tunnel Eco Wave

The DRU Metro 80XT Tunnel is the see-through version of the smallest gas fire in the popular Metro range. With a width of only 80 cms, it is the ideal Metro fire to insert into a dividing wall for smaller living rooms.

The Metro 80XT Tunnel can either have a traditional log fire display or a fire bed of white Carrara pebbles. Its has a generous heat output of 5.6 kW, making it ideal for the average living room, or as additional heating in the well-insulated modern home.

The interior of the Metro 80XT Tunel is in smooth black in order to set off the beautiful flame picture. The fire is an impressive 84% efficient, so as well as creating a dramatic focal point, it is also one of the most economical gas fires in the DRU collection.

This see-through Metro 80XT model is perfect as a living space divider. The unique burner spreads the fire across the entire width and depth. The raised pane provides an even lovelier, bigger flame picture. The stove can either have a log set or white Carrara pebbles. Its low capacity of 5.1kW makes this fire ideal for smaller living spaces, or as additional heating in the well-insulated modern home.
