

## Dru Metro 100XT/2 Eco Wave

Metro 100XT/2 is a unique 2 sided balanced flue gas fire. It can be used as part of a room dividing wall, transforming a conventional living space into a warm and spectacular environment.

The fire is available with natural twigs or Carrara stone fire beds and in either natural gas or LPG versions. As a balanced flue fire, it can be installed in homes with no conventional chimney, so you can create a fireplace where none has existed before.

The interior of the fire can be supplied in a smooth black finish for a clear and realistic flame picture. There is also the option of Ceraglass, a mirrored material that creates an infinity-like fire visual effect.

It has a substantial heat output of 7 kW (6 kW LPG), enough for a larger than average living room. To complete the visual experience, Kernow Fires provides complimentary raised hearths and false chimney breasts in heat resistant materials.

Metro 100XT/2 is not simply a decorative gas fire. It provides a practical and convenient source of heat, which is easy to operate and simple to clean and maintain. Operation is by a remote control, including a room temperature indicator. And with 85% efficiency, it is as economical as it is elegant.

### Specifications

Height: 812

Width: 1133

Depth: 466

Fuel: Gas

Output: 4kw - 9kw

Efficiency: 85
