

Dru Lugo 70/3 & Dru Lugo 80/3 Eco Wave

The DRU Lugo 70 and 80 gas fires are available as two-sided corner or three-sided panoramic models, so the impressive log fire displays can be viewed from many different angles in the living room.

Lugo fires have a beautiful sleek finish. No ventilation openings are visible within the frames and the glass window connects directly to the plinth for a smooth and modern appearance. Interior finishes include matt black, ribbed cast iron or mirrored Ceraglass for an almost infinite flame picture.

Lugo gas fires are enhanced by the use of Kernow Fires bespoke false chimney breasts and floating hearths in a selection of colour finishes to suit any kind of décor.

The Eco Wave allows the user to adjust the height of the flames by up to 15 different settings using a tablet app. This means that you can select the individual flame picture that suits you, whilst at the same time saving up to 50% in daily gas consumption.

The special app is available for iPad or Android tablets and has a number of other special features. It constantly monitors the performance of the fire and alerts the user to any servicing or maintenance requirements. It can even be programmed to link this information to Kernow Fires.

Lugo also includes a newly designed Easy Release® glass door, making routine cleaning and maintenance much easier. And like all DRU fires, Lugo is provided with an electronic remote control with room temperature display.

Specifications

Height: 765

Width: 787/892

Depth: 323/383

Fuel: Gas

Output: 3kw - 7kw

Efficiency: 85
