

Charnwood Stove Pod

charnwood 

The Charnwood Stove Pod is designed specifically for use in tents, pods, shepherd huts, glamping sites, home offices and smaller homes. The pod can be placed on any hard surface without additional protection and is built to house smaller stoves, specifically the Clearskies level 5 approved Charnwood woodburner the Aire 3.

The pod creates a safe enclosure for your stove without the need for an additional hearth and comes in black or in one of the Vlaze enamels.

The Charnwood Pod will be in store from the end of August 2021.
